## VINYL ON STEEL FRAME GATES

For single or double drive gates over 5' wide, we recommend vinyl-on-steel frame construction for structural integrity and long-term performance. This design utilizes round black or galvanized steel gate frames with fabricated vinyl gates attached to the face of the steel frames – creating a clean, finished look. The result is a gate that is significantly stronger and more durable for oversized gates, eliminating issues such as sagging or wind damage. For peace of mind, choose a steel frame construction for your larger gates.
